Profile

Clinical Data Manager with six years of experience at a CRO and a sponsor, from database design to database lock in phase I to III studies. Writes data management plans and edit check specifications, oversees EDC builds and leads data cleaning to lock. Works with CDISC CDASH and SDTM standards.

Career highlights

- Led data management on 12 studies through database lock, all on or ahead of the planned date.
- Reached database lock eight days after last patient last visit in a phase III study.
- Reduced manual queries by 40 percent with better edit check design.
- Oversaw two vendors for external data such as central lab and ECG.

Professional experience

Clinical Data Manager **March 2022 to present**
Biopharmaceutical sponsor (example) Cologne, Germany

- Write data management plans, CRF completion guidelines and edit check specifications.
- Oversee CRO data management and review metrics weekly.
- Lead user acceptance testing of EDC builds in Medidata Rave.

Clinical Data Associate **January 2020 to February 2022**
Global CRO (example) Düsseldorf, Germany

- Raised and resolved queries and reconciled SAE data with safety.
- Coded adverse events and medications in MedDRA and WHODrug.
- Prepared data for interim analyses.

Education

University of Cologne. Master of Science in Biology, 2019
