Profile

Qualified Chemical Laboratory Technician with six years of experience in pharmaceutical quality control under GMP. Runs HPLC, GC and wet-chemistry release and stability testing for drug substance and drug product. Trained on Empower and LIMS and familiar with out-of-specification investigations. Known for clean documentation and right-first-time results.

Career highlights

- Analysed about 900 samples a year with a documentation error rate below one percent.
- Transferred three HPLC methods from development to QC, including protocols and reports.
- Reduced HPLC sample backlog from 12 to 4 working days by reorganising the weekly run plan.
- Acted as trainer for four new technicians on GMP documentation and Empower.

Professional experience

QC Laboratory Technician **August 2021 to present**
Global pharmaceutical company (example) Basel, Switzerland

- Perform release and stability testing by HPLC, GC, Karl Fischer titration and dissolution.
- Review colleagues' raw data and Empower results as second person.
- Support OOS and laboratory investigations and write the first draft of the report.

Laboratory Technician **September 2019 to July 2021**
Contract testing laboratory (example) Freiburg, Germany

- Tested raw materials against Ph. Eur. monographs, including IR, UV and titration.
- Calibrated and maintained balances, pH meters and dissolution testers.
- Logged samples and results in LIMS.

Education

Vocational training as Chemical Laboratory Technician (Chemielaborant), Chamber of Industry and Commerce examination, 2019

Further training

GMP for laboratory staff (2023) | Data integrity in the QC lab (2024) | Empower 3 advanced user (2022)

Languages

German (native) | English (good)

Core competencies

HPLC | GC | Dissolution | Karl Fischer | IR and UV | Ph. Eur. and USP | Empower 3 | LIMS | GMP documentation | Data integrity | OOS investigations | Method transfer
