Profile

Medical Science Liaison with four years of field medical experience in solid tumour oncology, after a doctorate and a postdoc in cancer biology. Builds peer-to-peer relationships with about 45 key opinion leaders, supports investigator-initiated studies and brings field insights into medical strategy. Works within the compliance rules that separate medical from commercial activity.

Career highlights

- Supported four investigator-initiated studies from concept to ethics approval.
- Delivered 25 insights reports that shaped two advisory boards and the national medical plan.
- Trained the sales force on new phase III data before a launch.
- Ranked top MSL for KOL engagement quality in the region in 2025.
