Profile

QC Microbiologist with five years of experience in sterile pharmaceutical manufacturing. Runs environmental monitoring, sterility, endotoxin and bioburden testing and leads microbiological deviation investigations. Supported the site's implementation of the revised EU GMP Annex 1 and two regulatory inspections.

Career highlights

- Wrote the environmental monitoring part of the site's Annex 1 contamination control strategy.
- Led 22 microbiological deviation investigations, each closed within 30 days.
- Validated a rapid sterility test method that shortened release time by eight days.
- Trained 60 cleanroom operators in aseptic behaviour and gowning.

Professional experience

QC Microbiologist **February 2022 to present**
Sterile injectables manufacturer (example) Vienna, Austria

- Plan and trend environmental and personnel monitoring for grade A to D areas.
- Perform sterility, endotoxin (LAL) and bioburden tests according to Ph. Eur.
- Investigate excursions and write deviation and CAPA reports.

Laboratory Microbiologist **October 2020 to January 2022**
Contract testing laboratory (example) Graz, Austria

- Tested non-sterile products for microbial limits and specified microorganisms.
- Performed water testing and identification by MALDI-TOF.
- Maintained reference strains and growth promotion testing.

Education

University of Vienna. Master of Science in Microbiology and Immunobiology, 2020

Further training

EU GMP Annex 1 in practice (2023) | Root cause analysis (2022) | Aseptic process simulation (2024)

Languages

German (native) | English (business fluent)

Core competencies

Environmental monitoring | Sterility testing | Endotoxin (LAL) | Bioburden | Microbial limits | MALDI-TOF | EU GMP Annex 1 | Contamination control strategy | Deviations and CAPA | Cleanroom training
